

MANAGED AZURE INFRASTRUCTURE AS A SERVICE

THE CHALLENGE

Now that you have data in the cloud in Azure, the real challenge to manage, secure and maintain your cloud environment begins. Responsibilities include managing servers, keeping software up to date, setting configuration and security policies, monitoring system status, backing up data and controlling the cost of the environment. This diverse set of skills can be difficult for any organization to master successfully. The challenge to provide the proper resources and develop the new technical expertise required to effectively manage a company's Azure environment is a daunting task for most organizations.

THE SOLUTION

United Data Technologies (UDT) can help you efficiently monitor, manage, secure and support your Azure environment, including enhanced visibility into your Azure resources to optimize workloads and lower operational costs.

- Manage IaaS servers
 - Keep software and operating systems up to date
 - Set configuration and security policies
 - Patching updates
- User Rights and Account Management
 - Single sign-on to Azure resources and other cloud applications using unified authentication
 - Managing access controls and ensure that staff has the correct data access permissions based on access policies
 - Add/Move/Delete accounts and subscriptions for every department, project and application
- Backup and DR
 - Backups for app's, workloads, VM's and data
 - DR for mission critical applications
- 24x7 Proactive Monitoring and Help Desk Support
 - System health monitoring of VM's, CPU utilization, memory usage, storage IOP's and networking and WAN connections
 - U.S.-based staff for help desk support and troubleshooting
- Cost Management and Optimization
 - Right sizing and resource use optimization. Eliminate workloads running on underutilized resources and pay only for what is actually being consumed.
 - Billing Management, including breakdown by departments, customized tagging, total costs, peaks, etc.
 - Spend and demand forecasting. Integrate analytics to provision resources more accurately based on real time and historical data.

"You won't regret your decision to work with UDT - they make the process and setup easy. You'll be pleased with the outcome. Here is the list of what UDT does better than other IT firms I've worked with: Documentation of solutions, attention to details, knowledge of the solution, availability, flexibility and dedication to the project."

Clint Kinsey
Manager, IT Services
Front Burner Brands

"UDT makes a complex, very involved process, smooth. You feel like you are working with a team that is confident and experienced. As the customer, we feel like UDT is a trusted partner, they went over and above to make the project a success. They have a "Long term relationship mindset."

Robert Gonzalez
Director IT Infrastructure
SBA Communications

"The skill and proficiency of the UDT project management and technical teams is second only to their commitment to customer satisfaction. I've been in IT for almost 20 years and this was hands down one of the best, if not THE BEST, experience I've ever had working with a vendor, and I wouldn't consider UDT a vendor--they are a true partner."

Gilmore Lee
Manager, Enterprise Active Director
Fidelity National Financial

UDT SOLUTION OFFERINGS

UDT works closely with Microsoft and their sales and technical teams to deliver “Best of Breed” solutions. As part of that engagement we will do our very best to secure co-funding incentives to offset the costs of discovery assessments and architecture workshops to enable these solutions.

QUICKSTART FOR

OFFICE 365

Migrating mission critical business solutions to the cloud is one of the biggest challenges IT company's face in today's 'Cloud Everything' environment. Email, app access to data, end user security & mobile access. Let UDT help you reduce your TCO by moving to Office 365.
