

MANAGED CLOUD

Optimized Performance in the Cloud

THE SUCCESS OF YOUR BUSINESS CONTINUITY HINGES ON YOUR ABILITY TO ACCESS, MANAGE, AND BACK UP YOUR BIG DATA. RECOGNIZING THAT NOT ALL DATA IS CREATED EQUAL IS IMPORTANT IN DETERMINING THE BEST PATH TO OPTIMIZED DATA MANAGEMENT.

BENEFITS

- Seamlessly manage email and unified communications
- Remote secure backups in the cloud for peace of mind
- Simplify application deployments
- Save critical response time to quickly recover data after a breach
- Blend on-premise with the cloud

SERVICES

INFRASTRUCTURE AS A SERVICE (IAAS)

Our Infrastructure as a Service leverages leading technology vendors to offer a reliable, high-performance, virtual server infrastructure, empowering your organization to seamlessly blend cloud and managed services with Microsoft Azure premises-based solutions.

BACKUP AS A SERVICE (BAAS)

Our Backup as a Service, powered by Veeam, provides a remote, secure, cloud-based storage destination for your existing server infrastructures, enabling everything from installing a primary backup solution to complementing an existing solution with an additional target or repository.

EMAIL AS A SERVICE (OFFICE 365)

Our Email as a Service enables you to accomplish more through a full suite of support services, addressing needs ranging from personalized onboarding to simplified billing to live and virtual training resources, all designed to serve the rich features offered by Office 365.

DESKTOP AS A SERVICE (DAAS)

Our Desktop as a Service simplifies deployment and management of your desktop environment, making data and applications accessible through a virtual environment that allows you to support, patch, secure, and maintain one environment, rather than individual desktops.

UNIFIED COMMUNICATIONS AS A SERVICE

Our Unified Communications as a Service relies on the growing collection of integrated analytics, computing, database, mobile, networking, storage, and web services offered by Microsoft 365, helping you move forward, further, faster.

DISASTER RECOVERY AS A SERVICE (DRAAS)

Our Disaster Recovery as a Service saves critical response time by restoring your on-premise data in just hours, with a pre-built, fully configured virtual environment, quickly enabling your servers to run within our cloud environment for up to two weeks or beyond.

SQL AND WEB APPS IN AZURE

Our Managed SQL and Web Apps in Azure empowers your business to optimize and scale mission-critical applications to perfectly support all users and devices. Proactive 24x7x365 monitoring and machine learning facilitate and foster a responsive and highly available network that you can rely on and trust.

Microsoft Azure INTEGRATED CLOUD PLATFORM SERVICES

UDT is the partner. Azure is the platform.

Azure helps customers accelerate innovation with integrated cloud platform services, providing robust analytics and intelligence to empower business insights, and an open and flexible infrastructure to add value to customers' existing technologies.

With Azure, you gain the freedom to build and deploy wherever you want, using the tools, applications and frameworks of your choice.

With UDT, you gain an expert, certified partner with the skills, talent and expertise to move you forward, further, faster.

Together, we help customers accelerate innovation, unlock business insights, leverage diverse technologies, and secure data and applications.

Office 365 SIMPLIFIED IT MANAGEMENT

UDT's Office 365 PLUS! program gives you unprecedented access to powerful tools, accelerates employee productivity, and reduces capital expenditures.
